TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Core Concepts:

Data Structures & Algorithms, Object-Oriented Programming (OOP), Full-Stack Development, Software Design, System Architecture

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Backend: Django, FAST APIs

Databases: MongoDB, MySQL

Software Development Practices:

Agile Development, CI/CD, Testing, Debugging, Code Reviews

Distributed Systems & APIs: API

Integration, Microservices,

Distributed Systems, System Design, Service Communication

Quality Attributes: Scalability, Reliability, Performance Optimization, Security, Maintainability, Observability

Tools & Technologies:

Git, GitHub, VS Code, Postman

Cloud: AWS, GCP

Methodologies: SDLC, Agile Development, Debugging, Code Review

ACHIEVEMENTS

- Solved 300+ DSA problems.
- Developed scalable REST APIs focused on performance, reliability, and security.
- Collaborated with cross-functional teams to deliver high-quality software solutions

EXPERIENCE

Infotact Solution | Bengaluru, Karnataka

May 2025 – Present

- Collaborated with cross-functional teams including developers and stakeholders to design and deliver scalable full-stack applications using React.js and Node.js.
- Designed, developed, and maintained RESTful APIs supporting secure and reliable communication between distributed services.
- Improved application performance, stability, and maintainability through debugging, testing, and code optimization.
- Participated in code reviews and Agile development processes to ensure high-quality software delivery.
- Contributed to solution design discussions, identifying scalable and maintainable approaches for product requirements.
- Implemented software development best practices including version control, testing, and continuous improvement.

CodeSpeedy Technology Pvt | Kolkata, West Bengal

July 2024 – Dec 2024

- Developed and deployed a full-stack security application for detecting malicious URLs using Google Safe Browsing APIs.
- Built backend services using Python for threat analysis, risk evaluation, and automated processing workflows.
- Designed responsive user interfaces to improve usability and customer experience.
- Implemented monitoring and logging mechanisms to improve application reliability and performance visibility.
- Collaborated with mentors and team members to deliver production-ready software solutions.

PROJECT

AI-Powered Communication Assistant (NLP & RAG) | Node.js, Express.js, MongoDB

- Developed an AI-powered communication platform capable of generating context-aware responses using NLP techniques.
- Built scalable backend services and REST APIs for efficient request processing.
- Implemented Retrieval-Augmented Generation (RAG) to improve response accuracy and relevance.
- Worked with MongoDB for data storage and management.
- [GitHub](#)

Threat Detection Using AI | React.js, Node.js + Express.js

- Developed a full-stack threat detection platform using React.js and Node.js.
- Integrated external REST APIs to analyze and identify potentially malicious URLs.
- Designed responsive user interfaces and optimized application performance.
- Implemented backend services for secure data processing and analysis.
